

Enthusiastic frontend developer who enjoys to develop fast loading and responsive websites that meets customer requirements and achieve business objectives using Typescript, React and other modern technologies while leveraging my experience contributing to a team of software engineers in a Scrum based Agile delivery working environment.

PROFESSIONAL EXPERIENCE

Frontend Developer

First City Monument Bank (FCMB) Jul 2022 – Present (1 year +) | Hybrid

- Contributed to the building and optimization of some in-house applications to optimize productivity as well as customer-facing account management applications, which increased customer inflow by automating account opening processes.
- Played an active role in testing, troubleshooting, and resolving issues such as those related to performance, accessibility, browser compatibility, and security.
- Reviewing and approving pull requests from other team members.
- Collaborating on large codebase with other developers using git and the Microsoft Azure DevOps cloud solutions platform.

Frontend Developer

Muzzlab Technologies April 2020 – July 202 (2 years) | Remote

- Collaborated with the project manager and backend engineer.
- Effectively communicated with the product designer to ensure pixel perfect development user interfaces with minimal supervision.
- Ensured cross-platform development and optimization for mobile responsiveness and cross browser compatibility.
